Sir:

Applicant has received the Examiner's Statement of Reasons for Allowance with the April 11, 2006 Notices of Allowance and Allowability regarding the above-identified application. Entry of the Statement into the record should not be construed as any agreement with or acquiescence in the reasoning stated by the Examiner. Each of the claims stands on its own merits and is patentable because of the combination it recites and not because of the presence or absence of any one particular element.

Furthermore, Applicant submits that the Examiner has mischaracterized that which is recited in claim 1.

The Examiner states that Sakurai, U.S. Patent No. 6,089,761 fails to disclose "an optical pick up lens comprising a lens and a lens holder wherein each of the lens and the lens holder has at least eight marks are [sic] provided on positions of the periphery of the lens or on positions of the lens holder which are adjacent to the periphery of the lens as claimed in claim 1." However, claim 1 actually recites "[A]n optical pickup lens comprising a lens and a lens holder, wherein each of the lens and the lens holder has at least one mark in a direction of rotation based on an optical axis of the lens as a center of rotation, wherein at least eight marks are provided on positions of the periphery of the lens or on positions of the lens holder which are adjacent to the periphery of the lens," which is neither taught nor suggested by the cited art.

Thus, since the Examiner's Statement was not prepared by Applicant and only contains the Examiner's possible positions in one or more reasons for allowability, any interpretation with respect to the Examiner's Statement of Reasons for Allowance should not be imputed to the Applicant.

Dated: July 11, 2006

Respectfully submitted,

By
